**copmg with your difficult older parent:** A Bittersweet Season Jane Gross, 2011-04-26 Just a few of the vitally important lessons in caring for your aging parent—and yourself—from Jane Gross in A Bittersweet Season As painful as the role reversal between parent and child may be for you, assume it is worse for your mother or father, so take care not to demean or humiliate them. Avoid hospitals and emergency rooms, as well as multiple relocations from home to assisted living facility to nursing home, since all can cause dramatic declines in physical and cognitive well-being among the aged. Do not accept the canard that no decent child sends a parent to a nursing home. Good nursing home care, which supports the entire family, can be vastly superior to the pretty trappings but thin staffing of assisted living or the solitude of being at home, even with round-the-clock help. Important Facts Every state has its own laws, eligibility standards, and licensing requirements for financial, legal, residential, and other matters that affect the elderly, including qualification for Medicare. Assume anything you understand in the state where your parents once lived no longer applies if they move. Many doctors will not accept new Medicare patients, nor are they legally required to do so, especially significant if a parent is moving a long distance to be near family in old age. An adult child with power of attorney can use a parent's money for legitimate expenses and thus hasten the spend-down to Medicaid eligibility. In other words, you are doing your parent no favor—assuming he or she is likely to exhaust personal financial resources—by paying rent, stocking the refrigerator, buying clothes, or taking him or her to the hairdresser or barber.

**coping with your difficult older parent:** *When Parents Have Problems* Susan B. Miller, 2019-02-21 Numerous books have been written for adults who grew up coping with troubled and difficult parents. Often the adults who read these books say, I wish someone had told me that when I was a kid; it might have helped me so much. Unfortunately, not much has been written for the kids who are coping in the present with difficult or troubled parents. This book is written out of the belief that intelligent kids can use sound ideas to improve their lives, either on their own or with the help of healthy adults. It will offer help in sorting out whether a difficult situation may be a result of a parent's problems. In this new third edition, changes have been made throughout in order to update and refine the author's ideas. Two new chapters have been added, as well. The first new chapter addresses parents who tell lies. Dishonest parents are motivated in several different ways, but all dishonest parents pose special problems for their children. The second chapter discusses the idea that all parents have problems some of the time. In this chapter, the author helps young people look at the challenges posed by recognizing that all parents, even excellent ones, have shortcomings, and it differentiates between the ordinary shortcomings that all parents have and more serious problems in parenting. This book is an excellent resource for therapists, school counselors, group leaders, and others who work with children and teenagers and who want reading materials to recommend to them.

**coping with your difficult older parent: Adult Sibling Relationships** Geoffrey L. Greif, Michael E. Woolley, 2015-12-08 The bond siblings develop in childhood may be vastly different from the relationship that evolves in adulthood. Driven by affection but also characterized by ambivalence and ambiguity, adult sibling relationships can become hurtful, uncertain, competitive, or exhausting though the undercurrents of love and loyalty remain. An approach that recognizes the positive aspects of the changing sibling relationship, as well as those that need improvement, can restore healthy ties and rebuild family closeness. With in-depth case studies of more than 260 siblings over the age of forty and interviews with experts on mental health and family interaction, this book offers vital direction for traversing the emotional terrain of adult sibling relations. It pursues a richer understanding of ambivalence, a normal though little explored feeling among siblings, and how ambiguity about the past or present can lead to miscommunication and estrangement. For both professionals and general readers, this book clarifies the most confounding elements of sibling relationships and provides specific suggestions for realizing new, productive avenues of friendship in middle and later life—skills that are particularly important for siblings who must cooperate to care for aging parents or give immediate emotional or financial support to other siblings or family members.

**coping with your difficult older parent: *Children of the Self-Absorbed*** Nina W Brown, 2008-04-01 Being a parent is usually all about giving of yourself to foster your child's growth and development. But what happens when this isn't the case? Some parents dismiss the needs of their children, asserting their own instead, demanding attention and reassurance from even very young children. This may especially be the case when a parent has narcissistic tendencies or narcissistic personality disorder. From the author of *Working with the Self-Absorbed* and *Loving the Self-Absorbed*, this major revision of a self-help classic offers a step-by-step approach to resolving conflict and building a meaningful relationship with a narcissistic parent. *Children of the Self-Absorbed* offers clear definitions of narcissism and narcissistic personality disorder to help you identify the extent of your parent's problem. You'll learn the different types of destructive narcissism and how to recognize their effects on relationships. With the aid of proven techniques, you'll discover that you're not helpless against your parent's behavior and that you needn't consider giving up on the relationship. Instead, realistic strategies and steps are suggested for learning to set mutually agreed upon behaviors that can help you fulfill your needs and expectations.

**coping with your difficult older parent: Can't We Talk about Something More Pleasant?** Roz Chast, 2014-05-06 #1 New York Times Bestseller 2014 NATIONAL BOOK AWARD FINALIST In her first memoir, New Yorker cartoonist Roz Chast brings her signature wit to the topic of aging parents. Spanning the last several years of their lives and told through four-color cartoons, family photos, and documents, and a narrative as rife with laughs as it is with tears, Chast's memoir is both comfort and comic relief for anyone experiencing the life-altering loss of elderly parents. When it came to her elderly mother and father, Roz held to the practices of denial, avoidance, and distraction. But when Elizabeth Chast climbed a ladder to locate an old souvenir from the "crazy closet"-with predictable results-the tools that had served Roz well through her parents' seventies, eighties, and into their early nineties could no longer be deployed. While the particulars are Chast-ian in their idiosyncrasies-an anxious father who had relied heavily on his wife for stability as he slipped into dementia and a former assistant principal mother whose overbearing personality had sidelined Roz for decades-the themes are universal: adult children accepting a parental role; aging and unstable parents leaving a family home for an institution; dealing with uncomfortable physical

intimacies; managing logistics; and hiring strangers to provide the most personal care. An amazing portrait of two lives at their end and an only child coping as best she can, *Can't We Talk about Something More Pleasant* will show the full range of Roz Chast's talent as cartoonist and storyteller.

**coping with your difficult older parent:** *Families Caring for an Aging America* National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Care Services, Committee on Family Caregiving for Older Adults, 2016-12-08 Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. *Families Caring for an Aging America* examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

**coping with your difficult older parent:** *When Your Adult Child Breaks Your Heart* Joel Young, Christine Adamec, 2013-12-03 Behind nearly every adult who is accused of a crime, becomes addicted to drugs or alcohol, or who is severely mentally ill and acting out in public, there is usually at least one extremely stressed-out parent. This parent may initially react with the bad news of their adult child behaving badly with, Oh no! followed by, How can I help to fix this? A very common third reaction is the thought, Where did I go wrong--was it something I said or did, or that I failed to do when my child was growing up that caused these issues? Is this really somehow all my fault? These parents then open their homes, their pocketbooks, their hearts, and their futures to saving their adult child--who may go on to leave them financially and emotionally broken. Sometimes these families also raise the children their adult children leave behind: 1.6 million grandparents in the U.S. are in this situation. This helpful book presents families with quotations and scenarios from real suffering parents (who are not identified), practical advice, and tested strategies for coping. It also discusses the fact that parents of adult children may themselves need therapy and medications, especially antidepressants. The book is written in a clear, reassuring manner by Dr. Joel L. Young, medical director of the Rochester Center for Behavioral Medicine in Rochester Hills, Michigan; with noted medical writer Christine Adamec, author of many books in the field. In the wake of the

Newtown shooting and the viral popularity of the post I Am Adam Lanza's Mother, America is now taking a fresh look, not only at gun control, but also on how we treat mental illness. Another major issue is our support or stigmatization of those with adult children who are a major risk to their families as well to society itself. This book is part of that conversation.

**coping with your difficult older parent: Parenting Matters** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Supporting the Parents of Young Children, 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Suddenly you find yourself at the cusp of one of the most important transitions in your life—and the life of your family. Your parents need you and your siblings to step up and take care of them, a little or a lot. To make the right things happen, you will all need to work together. And how will this be decided and carried out? • How will you negotiate caregiving issues and deal with unequal contributions or power struggles? • How can inheritance and the division of property, assets, and personal effects be handled to minimize hurt feelings and resentment? • How will you cope with the natural reemergence of unresolved childhood rivalries, hurts, and needs? • How can caring for your parents be an enriching experience rather than a thankless chore? • Most important, how can you ensure the best care for your parents while lessening conflict, guilt, anger, and angst? Written by a veteran journalist who chronicles life and how baby boomers live it, *They're Your Parents, Too!* offers all the information, insight, and advice you'll need to make productive choices as you and your siblings begin to assume your parents' place

**coping with your difficult older parent: When Your Child Has a Chronic Medical Illness**

Frank J. Sileo, Carol S. **coping with your difficult older parent: A Catholic Guide to Caring for Your Aging**

**Parent** Monica Dodd, 2009-06-15 Monica Dodds understands the pressures that millions of middle-aged Americans endure as they become caregivers to aging parents. Her professional work with the elderly has exposed her to the complex medical, financial, and legal problems that entangle older people. Her personal experience helping ailing family members has given her deep insight into the difficulties caregivers face in dealing with these problems. *A Catholic Guide to Caring for Your Aging Parent* is a comprehensive guide for caregivers. Dodds insists that faith is a fundamental part of caregiving, and her approach is deeply rooted in Catholic spirituality. She shows adult children how they can love and serve their aging parents better by deepening their own spiritual lives. Caregiving, she says, is a time of many grace-filled moments. Dodds explains how to properly assess the needs of a failing older person, and she writes in detail about the physical, mental, emotional, interpersonal, and spiritual dimensions of care. Three extensive appendices provide checklists for assessing needs, a compilation of resources, and an anthology of prayers.

**coping with your difficult older parent: Death of a Parent** Debra Umberson, 2003-04-28

When a parent dies, most adults are seized by an unexpected crisis that can trigger a profound transformation. Using in-depth interviews and national surveys, Dr Umberson explains why the death of a parent has strong effects on adults and looks at protective factors that help some individuals experience better mental health following the death than they did when the parent was alive. This is the first book to rely on sound scientific method to document the significant adverse effects of parental death for adults in a national population. Exploring the social and psychological risk factors that make some people more vulnerable than others, readers will come to view the loss of a parent in a new way: as a turning point in adult development.

**coping with your difficult older parent: Running on Empty** Jonice Webb, 2012-10-01

A large segment of the population struggles with feelings of being detached from themselves and their loved ones. They feel flawed, and blame themselves. *Running on Empty* will help them realize that they're suffering not because of something that happened to them in childhood, but because of something that didn't happen. It's the white space in their family picture, the background rather than the foreground. This will be the first self-help book to bring this invisible force to light, educate people about it, and teach them how to overcome it.

**coping with your difficult older parent: Hope for the Caregiver** Peter Rosenberger,

**coping with your difficult older parent: Running on Empty No More** Jonice Webb,

2017-11-07 "Opens doors to richer, more connected relationships by naming the elephant in the room 'Childhood Emotional Neglect'" (Harville Hendrix, PhD & Helen Lakelly Hunt, PhD, authors of the New York Times bestseller *Getting the Love You Want*). Since the publication of *Running on Empty: Overcome Your Childhood Emotional Neglect*, many thousands of people have learned that

invisible Childhood Emotional Neglect, or CEN, has been weighing on them their entire lives, and are now in the process of recovery. *Running on Empty No More: Transform Your Relationships* will offer even more solutions for the effects of CEN on people's lives: how to talk about CEN, and heal it, in relationships with partners, parents, and children. "Filled with examples of well-meaning people struggling in their relationships, Jonice Webb not only illustrates what's missing between adults and their parents, husbands, and their wives, and parents and their children; she also explains exactly what to do about it." —Terry Real, internationally recognized family therapist, speaker and author, *Good Morning America*, *The Today Show*, 20/20, Oprah, and *The New York Times* "You will find practical solutions for everyday life to heal yourself and your relationships. This is a terrific new resource that I will be recommending to many clients now and in the future!" —Dr. Karyl McBride, author of *Will I Ever Be Good Enough?*

**coping with your difficult older parent: *Your Turn for Care*** Laura S. Brown, Laura S Brown, PH D, 2012-12-13 *Your Turn* is the first book for adults who were abused and maltreated by older family members who are now faced with the aging and death of those abusive elders. This book discusses the reasons that this normal life passage has become especially difficult for adult survivors, drawing on psychological research about the long-term effects of childhood maltreatment. It then addresses how adult survivors can move through this time of time and make it into an opportunity for their own healing. Specific suggestions for self-care and strategies for decision-making are presented. An extensive list of written and on-line resources on a variety of related topics is included in the book. *Your Turn* is the only book that speaks to the special concerns of adult survivors of childhood maltreatment who are at this juncture in their lives.

**coping with your difficult older parent: *The Caregiving Trap*** Pamela D. Wilson, 2015-10-06 *The Caregiving Trap* combines the authentic life and professional experience of Pamela D. Wilson, who provides recommendations for overwhelmed and frustrated caregivers who themselves may one day need care. *The Caregiving Trap* includes stories about Pamela's actual personal and professional experience along with end of chapter exercises to support caregivers. Common caregiving issues include: A sense of duty and obligation to provide care that damages family relationships Emotional and financial challenges resulting in denial of care needs Ignorance of predictive events that result in situations of crises or harm Delayed decision making and lack of planning resulting in limited choices Minimum standards of care supporting the need for advocacy

**coping with your difficult older parent:** *Occupational Therapy Practice Framework: Domain and Process* Aota, 2014 As occupational therapy celebrates its centennial in 2017, attention returns to the profession's founding belief in the value of therapeutic occupations as a way to remediate illness and maintain health. The founders emphasized the importance of establishing a therapeutic relationship with each client and designing an intervention plan based on the knowledge about a client's context and environment, values, goals, and needs. Using today's lexicon, the profession's founders proposed a vision for the profession that was occupation based, client centered, and evidence based--the vision articulated in the third edition of the Occupational Therapy Practice Framework: Domain and Process. The Framework is a must-have official document from the American Occupational Therapy Association. Intended for occupational therapy practitioners and students, other health care professionals, educators, researchers, payers, and consumers, the Framework summarizes the interrelated constructs that describe occupational therapy practice. In addition to the creation of a new preface to set the tone for the work, this new edition includes the following highlights: a redefinition of the overarching statement describing occupational therapy's domain; a new definition of clients that includes persons, groups, and populations; further delineation of the profession's relationship to organizations; inclusion of activity demands as part of the process; and even more up-to-date analysis and guidance for today's occupational therapy practitioners. Achieving health, well-being, and participation in life through engagement in occupation is the overarching statement that describes the domain and process of occupational therapy in the fullest sense. The Framework can provide the structure and guidance that practitioners can use to meet this important goal.
