Eldredge, 2014-05-02 Professor Dee L. Eldredge's Teaching Spanish, My Way is a treasure trove of information and a resource manual of over 370 pages to aid Spanish teachers / professors in their efforts to help students learn Spanish. It contains the author's philosophy of teaching; suggestions for course and class preparation; principles of teaching that he follows; general linguistic, syntax, lexical, phonetic, and morphological explanations; Spanish language rules; Spanish historical, cultural, and geographical information; handouts that have been used a lot by the professor; and cards that have been utilized with great success to teach Spanish, especially at the beginning of classes. Would you like to read information about how to take charge of a class and more about the responsibilities of a teacher? Chapter 1 of the book gives the reader the author's philosophy of teaching and much information on his perspectives relating to a teacher's responsibilities. Topics such as being in charge of the class, being prepared for everything, grading practices, using time efficiently during class, presenting grammar, implementing oral drills, students speaking as much Spanish as possible during the class and before / after class with the teacher, being courteous, and others will help you be a better teacher / professor. Would you like to be better organized and run your classes more smoothly? Chapter 2 details many subjects important to course organization, class preparation, and class instruction. As part of course organization, syllabuses, schedule of classes, handouts, marking up textbooks, folders, copies, tests, and examining classrooms are discussed. Appertaining to class preparation, planning of the activities for the next class, grading, recording and placing papers in folders, handouts, and tests are explained. Concerning class instruction and activities, the following topics are presented: directing a class, starting a class, reviewing homework, asking questions, presenting new grammar, practicing new grammar, presenting new homework, reading, using handouts, giving tests/exams, grading and reviewing tests, and ending class. Would you like to have some excellent rules that would help you teach your classes more suitably? Chapter 3 lists the many rules that the author follows in teaching his classes. Some deal with the interaction with students, others with the organization of the classroom, others with the preparation of classes, and others with the way he organizes everything. Would you like to have explanations of grammar and linguistics that very much help you teach more competently? Chapter 4, which is by far the longest, gives explanations of many items in linguistics that can greatly aid Spanish teachers---such as synthetic and analytic languages; declensions; syntactical notation; thematic relations and relators; complementation; arguments; vocalic and consonantal languages; adverbials; markers; a sentence; moods; voices; raising; pro-forms; noun phrases; cases with pronouns; pronouns after prepositions; clitics; leísmo, láismo, and loísmo; relative pronouns; clitic doubling; determiners; homonyms; verb phrases; verbal complementation; verbal particles; verbal aspect; verb forms; the English "dummy it"; usage comparison of auxiliary verbs in English and Spanish; prepositional phrases; prepositional complementation; modifiers; position of modifier adjectives; conjunctions; multiple meanings of English and Spanish verbs and other words; affirmative and negative words; question words; false cognates; Spanish and English verb problems; the silent h and u; juncture; phonemes; diphthongs; phonetic stress; vowels and consonants; representatives of sounds; spelling problems; cognates; and usage of linguistics in the classroom. This chapter aids the teacher to deliver the whys and wherefores to many grammatical problems—as for example, why the h became silent in Spanish, where the name California came from, and why the Spanish chose habla

READING FOR SPANISH-SPEAKING STUDENTS Elva Duran, 2013-04-01 Students whose first language is not English are the fastest-growing group in public schools in all regions of the United States. Almost 10 million children between the ages of five and 17 live in the homes and communities in which a language other than English is spoken and presently most schools in the U.S. are under-educating many English learners. The achievement of Hispanic students needs to improve dramatically over the next five years and this book describes the cornerstone elements for bringing about this change. The initial chapter introduces direct instruction to be used with reading and literacy programs. Chapters 2 and 3 provide excellent review of the literature in language development and address developing language instruction, listening, and speaking with Spanish-speaking students and offers what a comprehensive language development program should look like. Chapter 4 reviews academic language and literacy instruction while the next addresses the components of instruction in Spanish. Chapter 6 offers lesson plan suggestions for Spanish-speaking students, while the following two sections discuss components that transfer and do not transfer in Spanish to English reading instruction. Chapter 9 reviews English language development and provides lesson plans for implementing SDAIE programs. Finally, Chapter 10 discusses two-way bilingual immersion and shares actual classroom schedules and lessons. This unique text will help in the preparation of primary grade teachers throughout the U.S. so that they may be successful with Hispanic students entering the public schools with little or no English background. It will also be a useful tool for school districts' staff development in addressing school improvement goals for increasing the achievement of Hispanic students.

La finalitat d'EDUPLUS és reforçar els vincles entre un total de sis equips de recerca de diferents universitats i comunitats autònomes d'Espanya, tots coneguts pel seu treball per establir una base científica sòlida per a la promoció de l'educació plurilingüe. the students are reading their exams in spanish: Research Informing Practice - Practice Informing Research David Schwarzer, Mary Petrón, Christopher Luke, 2011-04-01 "Research Informing Practice—Practice Informing Research: Innovative Teaching Methodologies for World Language Educators" is an edited volume that focuses on innovative, nontraditional methods of teaching and learning world languages. Using teacher-research projects, each author in the volume guides readers through their own personal journey and exploration of teaching methods, novelty, risk-taking, and reflection. Chapters include guiding questions, vignettes, and thick descriptions of classroom-based research in an assortment of instructional settings. Theoretical issues and an array of practical applications are presented, as well as additional research opportunities and guidelines for implementation in a variety of teaching and learning venues. While not professing to be a panacea for world language learning, this book provides various lines of theory, research, and practice as they interact with each other through teacher-research narratives. As a well-known African proverb asserts, "It takes a village to raise a child." Similarly, it takes a village to develop a master teacher, and it takes a community to create an exceptional classroom. Throughout this volume, authors share their voices, experiences, and expertise as a means of strengthening the village. They then invite readers to embark on their own methodological journeys. The text thus serves as a stimulus for further discussion and pedagogical development in world language settings. Teachers and researchers are challenged to think critically and reflectively about world language education, encouraged to design innovative methods, approaches, and techniques for their world language classes, and ultimately asked to share their findings with students, parents, peers, communities, and the village.

the students are reading their exams in spanish: Understanding International Students from Asia in American Universities Yingyi Ma, Martha A. Garcia-Murillo, 2017-10-20 This book is about international students from Asia studying at American universities in the age of globalization. It explores significant questions, such as: Why do they want to study in America? How do they make their college choices? To what extent do they integrate with domestic students, and what are the barriers for intergroup friendship? How do faculty and administrators at American institutions respond to changing campus and classroom dynamics with a growing student body from Asia? Have we provided them with the skills they need to succeed professionally? As they are preparing to become the educational, managerial and entrepreneurial elites of the world, do Asian international students plan to stay in the U.S. or return to their home country? Asian students constitute over 70 percent of all international students. Almost every major American university now faces unprecedented enrollment growth from Asian students. However, American universities rarely consider if they truly understand the experiences and needs of these students. This book argues that American universities need to learn about their Asian international students to be able to learn from them. It challenges the traditional framework that emphasizes adjustment and adaptation on the part of international students. It argues for the urgency to shift from this framework to the one calling for proactive institutional efforts to bring about successful experiences of international students.

the students are reading their exams in spanish: Language Policies and (Dis)Citizenship Vaidehi Ramanathan, 2013-08-07 This volume explores the concept of 'citizenship', and argues that it should be understood both as a process of becoming and the ability to participate fully, rather than as a status that can be inherited, acquired, or achieved. From a courtroom in Bulawayo to a nursery in Birmingham, the authors use local contexts to foreground how the vulnerable, particularly those from minority language backgrounds, continue to be excluded, whilst offering a powerful demonstration of the potential for change offered by individual agency, resistance and struggle. In addressing questions such as 'under what local conditions does dis-citizenship happen?'; 'what role do language policies and pedagogic practices play?' and 'what kinds of margins and borders keep humans from fully participating?' The chapters in this volume shift the debate away from visas and passports to more uncertain and contested spaces of interpretation.
