xvidio technologies startup o is: Entrepreneurship, Innovation and Technology Oswaldo Lorenzo, Peter Kawalek, Leigh Wharton, 2018-03-07 The combination of entrepreneurship, innovation and technology has become the source of disruptive business models that transform industries and markets. The integrative understanding of these three drivers of today's economy is fundamental to business. Entrepreneurship, Innovation and Technology aims to connect core models and tools that are already created by well-known authors and scholars in order to deliver a unique guide for building successful business models through the adoption of new technologies and the use of effective innovation methods. The book goes through the entrepreneurial lifecycle, describing and applying core innovation models and tools such as the business model canvas, lean startup, design thinking, customer development and open innovation, taking into consideration disruptive technologies such as mobile internet, cloud computing, internet of things and blockchain. Finally the book describes and analyses how successful cases have been applying those models and technologies. With the mix of an academic and practitioner team, this book aims to go against the grain by its positioning of entrepreneurship in the modern technology economy. This book will prove to be a vital text for any student, specialist or practitioner looking to succeed in the field.

xvidio technologies startup o is: Multimedia Technologies and Applications for the 21st Century Borko Furht, 1997-11-30 Multimedia Technologies and Applications for the 21st Century: Visions of World Experts presents contributions from leading researchers and experts describing their current research and their views of the future trends in the field. The book consists of thirteen chapters in five parts. These chapters tackle a number of critical issues in distributed multimedia systems and applications - from VLSI processors that support multimedia and multimedia servers, through multimedia databases and multimedia networks and communications, to merging multimedia applications. Only a few years ago multimedia seemed like a brand new research field and an emerging new industry. Today, at the edge of the 21st century, multimedia research is coming of age, and the multimedia industry has significantly grown with the total market estimated to be about $50 billion. Several years ago it was felt that the digital media revolution had just started; however, the seeds had been sown long before. Fundamental technologies, such as interactive laser disks, video games, and electronic encyclopedias were invented in the 1970s and 80s. They represented the seeds for current `hot' applications, such as digital libraries, video-on-demand, interactive television, and videoconferencing. Another aspect of the digital media revolution is the formation of a new media industry composed of computer, entertainment, communication, and consumer electronics companies. Many industry segments are currently involved in creating new products and services, positioning themselves for the 21st century. They include telephone, cable, and satellite TV companies, communication equipment companies, TV and radio broadcasters, on-line Internet service providers, cable channels, movie studios, record companies, book publishers, CD-ROM title creators, Internet tool vendors, multimedia software tools companies, computer companies, general software tools companies, computer add-on vendors, semiconductor vendors, and consumer electronics vendors. Multimedia Technologies and Applications for the 21st Century: Visions of World Experts should stimulate the curiosity of its readers and inspire new technological breakthroughs in this exciting field. It serves as a valuable reference for system designers, engineers, programmers, and managers who are involved in

multimedia systems, the Internet, and their applications. This book can also be used as a textbook for advanced courses on multimedia in engineering curricula.

xvidio technologies startup o is: *Financing Startups* Carlos Lassala, Samuel Ribeiro-Navarrete, 2022-03-17 There is no doubt that the proliferation of entrepreneurial activity is a current trend. Start-ups enable an effective transformation of knowledge, generating high added value to society. The objective of this book is to address the financing of the entrepreneurial process as a necessary element to articulate a solid business fabric, based on taking advantage of new opportunities. The book is structured in two parts. The first part takes as a reference the lack of financing in the entrepreneurship process and analyses different sources of financing available to entrepreneurs depending on the phase in which the project is located. The second part of the book analyses innovation and its links to the financing of start-ups, addressing the impact of emerging technologies and fintech services and the support of artificial intelligence. Finally, the book concludes with an examination of decentralized finance (DeFi), as an idea that is changing the financial world, giving rise to new financial paradigms.

xvidio technologies startup o is: New Frontiers in Entrepreneurial Fundraising Pau Sendra-Pons, Dolores Garzon, María-Ángeles Revilla-Camacho, 2023-09-19 This book on entrepreneurial fundraising combines rigor and applicability to train current and prospective entrepreneurs in the financing processes. Through its diverse set of chapters, it reviews the latest financing tools and dynamics, the most pressing dilemmas as well as practical examples of ideal methods in the economic-financial management of startups. This book analyzes the financing methods available to entrepreneurs from a practical perspective. Expert authors also present insights on topics such as the role of incubators and accelerators in entrepreneurial fundraising; crowd-based entrepreneurial fundraising instruments; factoring, leasing and confirming for entrepreneurs; government grants, subsidies, and tax reliefs; business angels and venture capital firms; access to capital markets through initial public offerings; and financing with crypto-assets. The book concludes with a discussion on emerging issues in the entrepreneurial finance paradigm, namely transparency and legitimacy and corporate governance in startups; and, additionally, provides a practical toolkit for fundraising, with the main mistakes, how to win over investors, success stories, and resounding failures. The editors, with extensive experience in advising entrepreneurs from a professional and academic perspective, have made a considerable effort to draw a learning roadmap that can be especially useful for entrepreneurs. Therefore, the resulting book may be of great interest to entrepreneurs and anyone interested in learning more about the financing process for entrepreneurs.

xvidio technologies startup o is: What Do Corporations Want? Timothy Kuhn, 2024-06-26 "Corporate purpose" has become a battleground for stakeholders' competing desires. Some argue that corporations must simply generate profit; others suggest that we must make them create social change. Leading organization studies scholar Timothy Kuhn argues that this "either-or" thinking dramatically oversimplifies matters: today's corporations must be many things, all at once. Kuhn offers a bold new Communicative Theory of the Firm to highlight the authority that creates corporations' identities and activities. The theory provides a roadmap for navigating that battleground of competing desires to produce more responsive corporations. Drawing on communicative and new materialist theorizing, along with three insightful case studies, this book thoroughly redefines our understandings of what corporations are "for."

The Four Steps to the Epiphany launched the Lean Startup approach to new ventures. It was the first book to offer that startups are not smaller versions of large companies and that new ventures are different than existing ones. Startups search for business models while existing companies execute them. The book offers the practical and proven four-step Customer Development process for search and offers insight into what makes some startups successful and leaves others selling off their furniture. Rather

than blindly execute a plan, The Four Steps helps uncover flaws in product and business plans and correct them before they become costly. Rapid iteration, customer feedback, testing your assumptions are all explained in this book. Packed with concrete examples of what to do, how to do it and when to do it, the book will leave you with new skills to organize sales, marketing and your business for success. If your organization is starting a new venture, and you're thinking how to successfully organize sales, marketing and business development you need The Four Steps to the Epiphany. Essential reading for anyone starting something new. The Four Steps to the Epiphany was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. Semiconductors link our geopolitics, our ongoing economic prosperity, and our technological competitiveness. This book draws on the deliberations of a multidisciplinary Hoover Institution–Asia Society working group of technologists, economists, military strategists, industry players, and regional policy experts to contemplate the dynamic global supply chain in semiconductors—one in which US industry faces growing vulnerabilities, China aggressively promotes home-grown semiconductor mastery, and Taiwan finds itself with a crucial monopoly on high-end logic chips sought by buyers globally. Silicon Triangle seeks to present a balanced view of how policies of the United States and its partners around semiconductors can increase the resilience of shared supply chains—and contribute to deterring conflict in the Taiwan Strait.

xvidio technologies startup o is: Distributed Systems with Node.js Thomas Hunter II, 2020-11-04 Many companies, from startups to Fortune 500 companies alike, use Node.js to build performant backend services. And engineers love Node.js for its approachable API and familiar syntax. Backed by the world's largest package repository, Node's enterprise foothold is only expected to grow. In this hands-on guide, author Thomas Hunter II proves that Node.js is just as capable as traditional enterprise platforms for building services that are observable, scalable, and resilient. Intermediate to advanced Node.js developers will find themselves integrating application code with a breadth of tooling from each layer of a modern service stack. Learn why running redundant copies of the same Node.js service is necessary Know which protocol to choose, depending on the situation Fine-tune your application containers for use in production Track down errors in a distributed setting to determine which service is at fault Simplify app code and increase performance by offloading work to a reverse proxy Build dashboards to monitor service health and throughput Find out why so many different tools are required when operating in an enterprise environment

xvidio technologies startup o is: The Walls Have Eyes Petra Molnar, 2024-05-21 With a foreword by E. Tendayi Achiume A chilling exposé of the inhumane and lucrative sharpening of borders around the globe through experimental surveillance technology In 2022, the U.S. Department of Homeland Security announced it was training "robot dogs" to help secure the U.S.-Mexico border against migrants. Four-legged machines equipped with cameras and sensors would join a network of drones and automated surveillance towers—nicknamed the "smart wall."

This is part of a worldwide trend: as more people are displaced by war, economic instability, and a warming planet, more countries are turning to AI-driven technology to "manage" the influx. Based on years of researching borderlands across the world, lawyer and anthropologist Petra Molnar's The Walls Have Eyes is a truly global story—a dystopian vision turned reality, where your body is your passport and matters of life and death are determined by algorithm. Examining how technology is being deployed by governments on the world's most vulnerable with little regulation, Molnar also shows us how borders are now big business, with defense contractors and tech start-ups alike scrambling to capture this highly profitable market. With a foreword by former UN Special Rapporteur E. Tendayi Achiume, The Walls Have Eyes reveals the profound human stakes of the sharpening of borders around the globe, foregrounding the stories of people on the move and the daring forms of resistance that have emerged against the hubris and cruelty of those seeking to use technology to turn human beings into problems to be solved.
