**bigelow institute for consciousness studies essays: *A New Science of the Afterlife*** Daniel Drasin, 2023-06-13 Reveals how the continuity of consciousness beyond the physical body can be objectively demonstrated • Explores 15 promising avenues of post-materialist scientific investigation currently underway • Provides a succinct account of the experience of transition to the “next life” and what one might expect when one arrives there • Explains how materialism has prevented us from realizing a deeper understanding of the nature of space, time, life, death, and consciousness Sharing his more than three decades of research into the afterlife and paranormal phenomena, award-winning documentary filmmaker Daniel Drasin shows that the continuity of human consciousness beyond the physical body and after death constitutes a legitimate area of scientific inquiry and that it can be objectively demonstrated. Drasin begins by revealing how our belief in materialism—through its effects on our social norms, taboos, and even language—has deeply constrained our civilization’s understanding of the nature of space, time, life, death, and consciousness. However, as Drasin explains, our deeply ingrained cultural habits tied to materialism have begun to change. He explores 15 promising post-materialist scientific investigations currently underway, focusing in depth on three examples that offer the most objectively irrefutable evidence for the survival of consciousness, including electronic audio and visual communications from the other side, the groundbreaking five-year Scole Experiment in physical mediumship, and the profoundly evidential reincarnation case of James Leininger. Looking at how language frames our perceptions about life and death, the author presents thought experiments and simple exercises to help us see through materialist ideology and perceive a broader landscape of reality. He provides a succinct account of the experience of transition to the “next life” and explores what the afterlife is made of, where it’s located, how it works, and what it’s for. Drasin shows how, by thinking and speaking about death and the survival of consciousness in new ways, we can facilitate a clearer, more relaxed, comfortable, and rational conversation about what awaits us all sooner or later on the other side of life.

**bigelow institute for consciousness studies essays: *Proof of Heaven*** Eben Alexander, 2012-10-23 Shares an account of his religiously transformative near-death experience and revealing week-long coma, describing his scientific study of near-death phenomena while explaining what he learned about the nature of human consciousness.

**bigelow institute for consciousness studies essays: *The Shift*** Rob MacGregor, Trish MacGregor, 2022-10-20 Just out of sight and mostly outside the awareness of mainstream media, a shift in consciousness is underway that’s beyond religion, politics, and science as we know it now. It’s an accelerated perception shared by millions worldwide: we are all energetically entangled. What affects one, affects all. Here in this sea of evolving awareness, we perceive intuitively, through the heart, and often experience astonishing coincidences or synchronicities. It’s here we might momentarily connect with a lost loved one, catch a glimpse of our future, or be nudged unexpectedly onto a different path. These wake-up calls alert us to a deeper matrix of reality. Welcome to The Shift.

**bigelow institute for consciousness studies essays: *Living in a Mindful Universe*** Eben Alexander, Karen Newell, 2017-10-17 Dr. Eben Alexander, author of international phenomenon *Proof of Heaven*, shares the next phase of his journey to understand the true nature of consciousness and how to cultivate a state of harmony with the universe and our higher purpose. In 2008, Dr. Eben Alexander’s brain was severely damaged by a devastating case of bacterial meningitis, and he lapsed into a weeklong coma. It was almost certainly a death sentence, but he miraculously survived and

brought back with him an astounding story. During those 7 days in coma, he was plunged into the deepest realms of consciousness and came to understand profound truths about the universe we inhabit. What he learned changed everything he knew about the brain, mind, and consciousness and drove him to ask a question confounding the entire scientific community: How do you explain the origins of consciousness if it is not a byproduct of the brain? His challenge relates to a revolutionary shift now underway within our modern scientific understanding. Ultimately, direct experience is key to fully understanding how we are all connected through the binding force of unconditional love and its unlimited power to heal. In *Living in a Mindful Universe*, the New York Times bestselling author of *Proof of Heaven* and *The Map of Heaven* shares his insights into the true nature of consciousness. Embracing his radically new worldview, he began a committed program of personal exploration into nonlocal consciousness. Along the way, he met Karen Newell, who had spent most of her lifetime living the worldview he had only just discovered was possible. Her personal knowledge came from testing various techniques and theories as part of her daily routine. With *Living in a Mindful Universe*, they teach you how to tap into your greater mind and the power of the heart to facilitate enhancement of healing, relationships, creativity, guidance, and more. Using various modalities related to meditation and mindfulness, you will gain the power to access that infinite source of knowing so vital to us all, ultimately enriching every facet of your life.

**bigelow institute for consciousness studies essays: *The Myth of an Afterlife*** Michael Martin,

Keith Augustine, 2015-03-12 Because every single one of us will die, most of us would like to know what—if anything—awaits us afterward, not to mention the fate of lost loved ones. Given the nearly universal vested interest in deciding this question in favor of an afterlife, it is no surprise that the vast majority of books on the topic affirm the reality of life after death without a backward glance. But the evidence of our senses and the ever-gaining strength of scientific evidence strongly suggest otherwise. In *The Myth of an Afterlife: The Case against Life after Death*, Michael Martin and Keith Augustine collect a series of contributions that redress this imbalance in the literature by providing a strong, comprehensive, and up-to-date casebook of the chief arguments against an afterlife. Divided into four separate sections, this collection opens with a broad overview of the issues, as contributors consider the strongest evidence of whether or not we survive death—in particular the biological basis of all mental states and their grounding in brain activity that ceases to function at death. Next, contributors consider a host of conceptual and empirical difficulties that confront the various ways of “surviving” death—from bodiless minds to bodily resurrection to any form of posthumous survival. Then essayists turn to internal inconsistencies between traditional theological conceptions of an afterlife—heaven, hell, karmic rebirth—and widely held ethical principles central to the belief systems supporting those notions. In the final section, authors offer critical evaluations of the main types of evidence for an afterlife. Fully interdisciplinary, *The Myth of an Afterlife: The Case against Life after Death* brings together a variety of fields of research to make that case, including cognitive neuroscience, philosophy of mind, personal identity, philosophy of religion, moral philosophy, psychical research, and anomalistic psychology. As the definitive casebook of arguments against life after death, this collection is required reading for any instructor, researcher, and student of philosophy, religious studies, or theology. It is sure to raise provocative issues new to readers, regardless of background, from those who believe fervently in the reality of an afterlife to those who do not or are undecided on the matter.

**bigelow institute for consciousness studies essays: Angels in the Trenches**

Leo Ruickbie, 2018-11-08 After a miraculous escape from the German military juggernaut in the small Belgian town of Mons in 1914, the first major battle that the British Expeditionary Force would face in the First World War, the British really believed that they were on the side of the angels. Indeed, after 1916, the number of spiritualist societies in the United Kingdom almost doubled, from 158 to 309. As Arthur Conan Doyle explained, 'The deaths occurring in almost every family in the land brought a sudden and concentrated interest in the life after death. People not only asked the question, If a man die, shall he live again? but they eagerly sought to know if communication was possible with the dear ones they had lost.' From the Angel of Mons to the popular boom in spiritualism as the horrors of industrialised warfare reaped their terrible harvest, the paranormal - and its use in propaganda - was one of the key aspects of the First World War. *Angels in the Trenches* takes us from defining moments, such as the Angel of Mons on the Front Line, to spirit communication on the Home Front, often involving the great and the good of the period, such as aristocrat Dame Edith Lytton, founder of the War Refugees Committee, and the physicist Sir Oliver Lodge, Principal of Birmingham University. We see here people at every level of society struggling to come to terms with the ferocity and terror of the war, and their own losses: soldiers looking for miracles on the battlefield; parents searching for lost sons in the séance room. It is a human story of people forced to look beyond the apparent certainties of the everyday - and this book follows them on that journey.

**bigelow institute for consciousness studies essays: Supernormal**

Dean Radin PhD, 2013-07-16 Can yoga and meditation unleash our inherent supernormal mental powers, such as telepathy, clairvoyance, and precognition? Is it really possible to perceive another person's thoughts and intentions? Influence objects with our minds? Envision future events? And is it possible that some of the superpowers described in ancient legends, science fiction, and comic books are actually real, and patiently waiting for us behind the scenes? Are we now poised for an evolutionary trigger to pull the switch and release our full potentials? Dean Radin, Director of Research at the Institute of

Noetic Sciences (IONS) and bestselling author of *The Conscious Universe*, presents persuasive new experimental evidence for the existence of such phenomena. He takes us on a thrilling scientific journey and challenges outdated assumptions that these abilities are mere superstition. Focusing on Patanjali's mysterious Yoga Sutras -- 2,000 year-old meditation practices believed to release our extraordinary powers -- Radin offers powerful evidence confirming that sometimes fact is much stranger, spookier, and more wonderful than the wildest fiction.

**bigelow institute for consciousness studies essays:** Eyewitness Testimony Elizabeth F. **bigelow institute for consciousness studies essays:** The Map of Heaven Eben Alexander, 2014-10-07 The author of the #1 New York Times bestseller *Proof of Heaven* teams up with the sages of times past, modern scientists, and with ordinary people who have had profound spiritual experiences to show the reality of heaven and our true identities as spiritual beings. When Dr. Eben Alexander told the story of his near-death experience and his vivid journey to the other side, many readers wrote to say it resonated with them profoundly. Thanks to them, Dr. Alexander realized that sharing his story allowed people to rediscover what so many in ancient times knew: there is more to life, and to the universe, than this single earthly life. Dr. Alexander and his coauthor Ptolemy Tompkins were surprised to see how often his readers' visions of the afterlife synced up with each other and with those of the world's spiritual leaders, as well as its philosophers and scientists. In *The Map of Heaven*, he shares the stories people have told him and shows how they are echoed both in the world's faiths and in its latest scientific insights. It turns out there is much agreement, across time and terrain, about the journey of the soul and its survival beyond death. In this book, Dr. Alexander makes the case for heaven as a genuine place, showing how we have forgotten, but are now at last remembering, who we really are and what our destiny truly is. *The Map of Heaven* takes the broad view to reveal how modern science is on the verge of the most profound revolution in recorded history—all around the phenomenon of consciousness itself!

**bigelow institute for consciousness studies essays:** Soul Survivor Andrea Leininger, Bruce Leininger, 2009-08-03 James Leininger was just two years old when he began having disturbing nightmares that would not stop. He screamed out in the night: 'Plane on fire! Little man can't get out!' While nightmares are common among children, what happened next shocked those around him... James began to reveal details of planes and war tragedies that no two-year-old boy could know. His desperate parents were at a loss to help him until he said three things: 'Corsair', 'Natoma' and 'Jack Larsen'. From these tantalising clues, James's parents travelled thousands of miles and spent many long years piecing together these facts to try and find an answer that could end his torment. Finally, despite his mother's fears and his father's staunch Christian beliefs, they found only one possibility to the endless coincidences that surrounded every detail in James's life - that their son was reliving the past life of a World War II fighter pilot. Their touching story is one that will challenge sceptics and confirm the beliefs of those who already believe in life after death.

**bigelow institute for consciousness studies essays:** Schnittstelle Tod Walter van Laack, 2024-03-12 Seit nunmehr 14 Jahren findet im Dreiländereck Aachen regelmäßig eine Tagung zu Nahtoderfahrungen (NTE) und, ganz allgemein, zur Thematik Leben und Tod statt. Natürlich geht es

dabei immer um die entscheidende Frage, ist unser Tod tatsächlich unser definitives Ende, wie es nach-wie-vor noch eine zumindest nach außen in die Öffentlichkeit getragene Überzeugung der meisten Naturwissenschaftler zu sein scheint, oder gibt es vielleicht doch ein Danach? Darüber referierten und diskutierten im November 2023 in Aachen erneut Naturwissenschaftler, Theologen, Philosophen und Mediziner, genauso wie NTE-Betroffene (oder besser 'Beschenkte') sowie auch Vertreter esoterischer Gruppen mit erneut vielen Teilnehmern im Auditorium. Entscheidend für die Auswahl der Referenten ist allein die Authentizität, mit der sie ihre Argumente und, wie durchaus natürlich gewünscht, auch polarisierenden Überzeugungen vorbringen. Gerade diese Vielfalt hat die Aachener Seminarreihe von Beginn an und bis heute immer wieder ausgezeichnet. Das diesjährige Symposium trug den Untertitel Ist die Menschheit zu retten ohne Vertrauen auf ein Danach? Der Untertitel ist das Ergebnis wohl manch unglaublicher und für sehr viele oft kaum noch nachvollziehbarer (gesellschafts-) politischer Entwicklungen vor allem in den letzten Jahren. Mittlerweile scheint es deshalb immer dringender, sich den Grundfragen zu Leben und Tod zu widmen; ohnehin betrifft es jeden Einzelnen früher oder später unmittelbar.

**bigelow institute for consciousness studies essays: Descartes' Error** Antonio Damasio, 2005-09-27 Since Descartes famously proclaimed, I think, therefore I am, science has often overlooked emotions as the source of a person's true being. Even modern neuroscience has tended, until recently, to concentrate on the cognitive aspects of brain function, disregarding emotions. This attitude began to change with the publication of Descartes' Error in 1995. Antonio Damasio—one of the world's leading neurologists (The New York Times)—challenged traditional ideas about the connection between emotions and rationality. In this wondrously engaging book, Damasio takes the reader on a journey of scientific discovery through a series of case studies, demonstrating what many of us have long suspected: emotions are not a luxury, they are essential to rational thinking and to normal social behavior.

**bigelow institute for consciousness studies essays: A Silvan Tomkins Handbook** Adam J. Frank, Elizabeth A. Wilson, 2020-08-04 An accessible guide to the work of American psychologist and affect theorist Silvan Tomkins The brilliant and complex theories of psychologist Silvan Tomkins (1911–1991) have inspired the turn to affect in the humanities, social sciences, and elsewhere. Nevertheless, these theories are not well understood. A Silvan Tomkins Handbook makes his theories portable across a range of interdisciplinary contexts and accessible to a wide variety of contemporary scholars and students of affect. A Silvan Tomkins Handbook provides readers with a clear outline of Tomkins's affect theory as he developed it in his four-volume masterwork Affect Imagery Consciousness. It shows how his key terms and conceptual innovations can be used to build robust frameworks for theorizing affect and emotion. In addition to clarifying his affect theory, the Handbook emphasizes Tomkins's other significant contributions, from his broad theories of imagery and consciousness to more focused concepts of scenes and scripts. With their extensive experience engaging and teaching Tomkins's work, Adam J. Frank and Elizabeth A. Wilson provide a user-friendly guide for readers who want to know more about the foundations of affect studies.

**bigelow institute for consciousness studies essays: Desert Oracle** Ken Layne, 2020-12-08 The cult-y pocket-size field guide to the strange and intriguing secrets of the Mojave—its myths and legends, outcasts and oddballs, flora, fauna, and UFOs—becomes the definitive, oracular book of the desert For the past five years, Desert Oracle has existed as a quasi-mythical, quarterly periodical available to the very determined only by subscription or at the odd desert-town gas station or the occasional hipster boutique, its canary-yellow-covered, forty-four-page issues handed from one curious desert zealot to the next, word spreading faster than the printers could keep up with. It became a radio show, a podcast, a live performance. Now, for the first time—and including both classic and new, never-before-seen revelations—Desert Oracle has been bound between two hard

covers and is available to you. Straight out of Joshua Tree, California, Desert Oracle is "The Voice of the Desert": a field guide to the strange tales, singing sand dunes, sagebrush trails, artists and aliens, authors and oddballs, ghost towns and modern legends, musicians and mystics, scorpions and saguaros, out there in the sand. Desert Oracle is your companion at a roadside diner, around a campfire, in your tent or cabin (or high-rise apartment or suburban living room) as the wind and the coyotes howl outside at night. From journal entries of long-deceased adventurers to stray railroad ad copy, and musings on everything from desert flora, rumored cryptid sightings, and other paranormal phenomena, Ken Layne's Desert Oracle collects the weird and the wonderful of the American Southwest into a single, essential volume.

**bigelow institute for consciousness studies essays: Nothing About Us Without Us** James I. Charlton, 1998-03-27 James Charlton has produced a ringing indictment of disability oppression, which, he says, is rooted in degradation, dependency, and powerlessness and is experienced in some form by five hundred million persons throughout the world who have physical, sensory, cognitive, or developmental disabilities. Nothing About Us Without Us is the first book in the literature on disability to provide a theoretical overview of disability oppression that shows its similarities to, and differences from, racism, sexism, and colonialism. Charlton's analysis is illuminated by interviews he conducted over a ten-year period with disability rights activists throughout the Third World, Europe, and the United States. Charlton finds an antidote for dependency and powerlessness in the resistance to disability oppression that is emerging worldwide. His interviews contain striking stories of self-reliance and empowerment evoking the new consciousness of disability rights activists. As a latecomer among the world's liberation movements, the disability rights movement will gain visibility and momentum from Charlton's elucidation of its history and its political philosophy of self-determination, which is captured in the title of his book. Nothing About Us Without Us expresses the conviction of people with disabilities that they know what is best for them. Charlton's combination of personal involvement and theoretical awareness assures greater understanding of the disability rights movement.

**bigelow institute for consciousness studies essays: *The Sciences of the Artificial*, reissue of the third edition with a new introduction by John Laird** Herbert A. Simon, 2019-08-13 Herbert Simon's classic work on artificial intelligence in the expanded and updated third edition from 1996, with a new introduction by John E. Laird. Herbert Simon's classic and influential *The Sciences of the Artificial* declares definitively that there can be a science not only of natural phenomena but also of what is artificial. Exploring the commonalities of artificial systems, including economic systems, the business firm, artificial intelligence, complex engineering projects, and social plans, Simon argues that designed systems are a valid field of study, and he proposes a science of design. For this third edition, originally published in 1996, Simon added new material that takes into account advances in cognitive psychology and the science of design while confirming and extending the book's basic thesis: that a physical symbol system has the necessary and sufficient means for intelligent action. Simon won the Nobel Prize for Economics in 1978 for his research into the decision-making process within economic organizations and the Turing Award (considered by some the computer science equivalent to the Nobel) with Allen Newell in 1975 for contributions to artificial intelligence, the psychology of human cognition, and list processing. *The Sciences of the Artificial* distills the essence of Simon's thought accessibly and coherently. This reissue of the third edition makes a pioneering work available to a new audience.

**bigelow institute for consciousness studies essays: Essays on Art and Language** Charles

Harrison, 2003-09-12 Critical and theoretical essays by a long-time participant in the Art & Language movement. These essays by art historian and critic Charles Harrison are based on the premise that making art and talking about art are related enterprises. They are written from the point of view of Art & Language, the artistic movement based in England—and briefly in the United States—with which Harrison has been associated for thirty years. Harrison uses the work of Art & Language as a central case study to discuss developments in art from the 1950s through the 1980s. According to Harrison, the strongest motivation for writing about art is that it brings us closer to that which is other than ourselves. In seeing how a work is done, we learn about its achieved identity: we see, for example, that a drip on a Pollock is integral to its technical character, whereas a drip on a Mondrian would not be. Throughout the book, Harrison uses specific examples to address a range of questions about the history, theory, and making of modern art—questions about the conditions of its making and the nature of its public, about the problems and priorities of criticism, and about the relations between interpretation and judgment.

**bigelow institute for consciousness studies essays: Parapsychology** Etzel Cardeña, John Palmer, David Marcusson-Clavertz, 2015-08-14 Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events, thinking of a long-lost friend just before he or she unexpectedly calls, or the ability to feel the presence of deceased loved ones. What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists, including Nobel laureates. Most of these researchers have concluded that some of these phenomena do occur, although we are far from explaining them to everyone's satisfaction. This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology, explaining what we know and don't know about so-called psi phenomena, such as telepathy, precognition or psychokinesis. Contributors evaluate the evidence for these phenomena, accounting for factors such as selective memory, wish fulfillment and incorrect methods or analyses, in some cases offering psychological, physical and biological theories. Instructors considering this book for use in a course may request an examination copy [here](#).

**bigelow institute for consciousness studies essays: Psychology of Intelligence Analysis** Richards J Heuer, 2020-03-05 In this seminal work, published by the C.I.A. itself, produced by Intelligence veteran Richards Heuer discusses three pivotal points. First, human minds are ill-equipped (poorly wired) to cope effectively with both inherent and induced uncertainty. Second, increased knowledge of our inherent biases tends to be of little assistance to the analyst. And lastly, tools and techniques that apply higher levels of critical thinking can substantially improve analysis on complex problems.
